EDUCATION

Concordia University

Montreal, QC

Bachelor of Engineering - Computer Engineering

Expected Graduation: May 2027

Relevant Courses: Data Structures and Algorithms, Computer Organization and Software, Digital System Design, Operating Systems

WORK EXPERIENCE

Keywords Studios

Montreal, QC

Functional QA Tester & QA intern

June 2017- September 2022

- Developed and executed 300+ comprehensive software test cases across mobile and desktop environments utilizing TestRail, improving overall test coverage and reducing post-release defects by 18%.
- Identified, documented, and triaged 500+ critical bugs using Jira, collaborating directly with development teams to propose targeted solutions that enhanced application performance and user experience.

Projects

Naval Engineering Test Establishment (NETE) Automatic Breathing Simulation Machine *June 2026-Present*

- Engineering an automated breathing machine control system using a National Instruments CompactRIO and linear actuators, improving hardware testing efficiency by 60%.
- Developing a frontend interface and data acquisition pipeline to monitor real-time system metrics, ensuring 100% precise operational control.

Shift Flow Employee Scheduling Web App

March 2026

- Developed a full-stack desktop scheduling application using JavaScript and MongoDB, generating automated monthly schedules for 20+ workers in under a minute.
- Built manager dashboard tools using React for real-time shift adjustments, reducing scheduling errors by 100%, improving workforce coordination efficiency.

Car-cycle Used Car Price Prediction ML Model

June 2026

- Engineered a machine learning data pipeline using Python and Scikit-Learn to clean and process 161,610 vehicle listings, successfully extracting 811 encoded features for market valuation
- Trained five predictive regression models using Grid Search and 5-fold cross-validation, deploying an optimized Random Forest Regressor that achieved a 0.94 R-squared score and a low Mean Absolute Error of \$2,067.61.

Munch AI Nutrition App & Smart Scale

August 2025-December 2025

- Developed a mobile nutrition tracking mobile app with a Java backend and XML Android frontend, integrating Firebase for real-time cloud data for 100+ simulated users
- Engineered a smart food scale with ± 0.01 g precision using an ESP32 microcontroller with Bluetooth connectivity, automating the logging of food weights reducing meal entry time by 90%

Inventory Management System (Brew & Renew Popup Store)

December 2024

- Developed a full stack inventory and POS web application using React, Flask, and PostgreSQL featuring automated QR code generation and mobile scanning, streamlining cart checkout for 200+ unique items.
- Developed an automated consignment settlement pipeline using Python and SQL to dynamically calculate vendor profit splits and update real-time inventory databases upon checkout completion, eliminating manual accounting errors by 100%.

Skills And Interests

- **Skills:** Python, Java, C++, C#, C, JavaScript, HTML/CSS | React, Node.js, Flask, Android XML, TensorFlow | SQL, MongoDB | Git, Jira | Embedded Systems, Verilog, VHDL
- **Interests:** Dragonboat, Volleyball, Gym, Cooking
